An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in this Draft Prospectus, particularly the “Financial Information” and the related notes, “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” on page no. 111 and 216 respectively of this Draft Prospectus and the risks and uncertainties described below, before making any decision to invest in our Equity Shares.

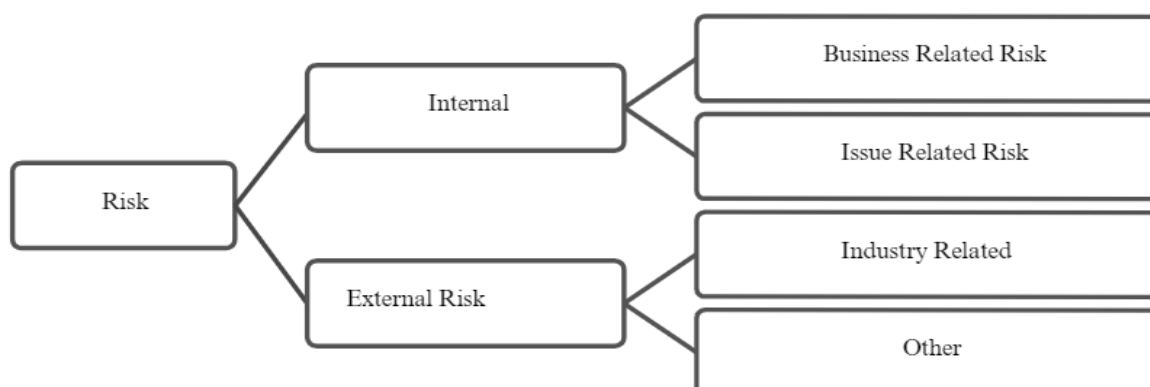

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. 1. ***We do not own the premises in which our registered office is located and the same are on lease arrangement. Any termination of such lease/license and/or non-renewal thereof and attachment by Property Owner could adversely affect our operations.***

Our Registered Office is presently located at 7th Floor 707 Iscon Elegance, Nr. Jain Temple, Prahladnagar Cross Road, S.G. Highway, Ahmedabad, Gujarat, India, 380051. The premises where our registered office is located are not owned by our Company. The office premise was taken on lease from our corporate promoter i.e. Inter India Roadways Private Limited on a monthly rental for a period of 11 months on renewal basis. Some of the warehouses and Business office of our company have been taken on Leave and License Agreement for more details please refer the section titled as “**Immovable Properties**” in the Chapter “**Our Business**” on page no. 111

If these agreements are not renewed, we will have to return our registered office, branch office, and warehouses to the licensor when the lease ends. There is no guarantee that the agreements will be renewed on terms that are favorable. If the licensor decides not to renew or ends the agreements, we will need to leave the premises where our operations are currently located. In that case, we would need to find new premises and sign a new lease or license agreement, which may have less favorable terms. This could lead to delays and temporarily affect our operations.

2. ***We have not entered into any party agreement with CDSL.***

Our company has obtained ISIN INE1AII01014 from NSDL. All company shares are currently in dematerialized form with NSDL. The company has also submitted an application to CDSL with application number 16282 and is awaiting its receipt. Please be aware that any delay in receiving the agreement could affect the dematerialization process. Furthermore, delays in finalizing the agreement or completing the dematerialization may result in postponing the opening and listing of our company’s shares.

3. ***Our business heavily relies on the expertise and guidance of our Directors and Key Managerial Personnel to ensure sustained success. The loss of any of them could have a significant impact on our company.***

Our Company’s success relies heavily on the ongoing support and services of our Key Managerial Personnel, as well as the leadership and contributions of our directors. These individuals are essential to our daily operations and the growth of our business. If we lose any of our Key Managerial Personnel or Directors, or are unable to find suitable replacements, it could have a significant negative impact on our Company. The loss of these key individuals could significantly affect our ability to manage and grow our business effectively, which would ultimately impact our financial results. We recognize the importance of retaining skilled employees at a reasonable cost, as their expertise is essential for implementing our growth strategy. Without a capable and dedicated workforce, we may face challenges in meeting our business goals. For further information regarding our Directors and Key Managerial Personnel, please refer to the chapter titled “**Our Management**” starting on page no. 146 of this Draft Prospectus.

4. ***Our business is dependent on the sale of our services to certain key Industries and certain customers including our Promoter Group Companies. The negative change in industry and/or loss of any of these customers or loss of revenue from sales to these customers could have a material adverse effect on our business, financial condition, results of operations and cash flows.***

Our business primarily consists of term contracts. In the long-term contracts freight rates are defined for the contract period. In the contractual business, we act as a Carrying and Forwarding Agent (“CFA”) to the customer for the period specified in the contract. However, we do not have long-term agreements with many of our customers, and as a result, the success of our business depends heavily on maintaining positive relationships with them. We cannot guarantee that our business with these customers will not be abruptly ended, or that it will continue on terms favorable to us, within the expected timeframe, or at all

At present, we derive most of our revenues from operations from limited set of customers and more than 90% of the revenue is from our top 5 customers.

Particulars (Top 5 Clients)	Unit	As at/ For 31.10.2024	As at/ For Fiscal 2024	As at/ For Fiscal 2023	As at/ For Fiscal 2022
Revenue from Operations	%	92.22%	92.02%	97.77%	97.38%
Average revenue per Client*	(in ₹ Lakhs)	681.62	1,080.40	851.64	790.34

* The average is taken of revenue earned by top 5 clients only.

However, the company's concentration risk has been reducing in the last 3 years i.e., from 99.79% in the financial year ended March 31,2022 to 91.97% in the financial year ended March 31,2024. For further details, please refer to the Chapter "**Financial information**" and "**Our Business**" on page no. 171 and 111 respectively of this Draft Prospectus.

Our ability to retain, renew, or expand relationships with key clients may vary due to several factors, including client satisfaction with our services, the reliability of our logistics, our pricing, and external factors beyond our control. These may include changes in a client's business strategy, technology, preferences, or management, shifts in market or economic conditions, or the emergence of more competitive offerings from other companies.

Additionally, losing any of these key clients could negatively affect our market position and reputation. In a competitive and reputation-sensitive market, any negative perception of our ability to maintain strong customer relationships could hurt our ability to attract new clients or keep existing ones. We cannot guarantee that we will maintain the same level of business with our top clients or secure favorable commercial terms

We cannot assure you that we will be able to maintain historic levels of business with our top customers or negotiate commercially favorable arrangements. Further, we may be reluctant to proceed against customer and strain the relations in the event of disagreements or disputes relating to our services.

5. ***There are outstanding legal proceedings involving our Company and one of our Promoters/ Directors. Any adverse outcome in such proceedings may have an adverse impact on our reputation, business, financial condition, results of operations and cash flows.***

A summary of outstanding matters set out below includes details of criminal proceedings, tax proceedings, statutory and regulatory actions and other material pending litigation involving us, Directors, Promoters and Group Entities, as at the date of this Draft Prospectus as tabled below:

Promoter is involved in one legal proceeding which are pending at different levels of adjudication before various courts, tribunals, enquiry officers, and appellate authorities. We cannot provide assurance that these legal proceedings will be decided in our favour. Any adverse decisions in any of the proceedings may have a significant adverse effect on our business, results of operations, cash flows and financial condition. 6. ***In case of our inability to obtain, renew or maintain the statutory and regulatory licenses, permits and approvals required to operate our business it may have a material adverse effect on our business.***

We are governed by various laws and regulations for our business and operations. We are required, and will continue to be required, to obtain and hold relevant licenses, approvals and permits at state and central government levels for doing our business. The approvals, licenses, registrations and permits obtained by us may contain conditions. Further we will need to apply for renewal of certain approvals, licenses, registrations and permits, which expire or need to update pursuant to change in name consequent upon conversion of company to public Company.

While we have applied for relevant licenses now and have obtained a significant number of approvals, licenses, registrations and permits from the relevant authorities, there can be no assurance that the relevant authority will issue an approval or renew expired approvals within the applicable time period or at all. Any delay in receipt or non-receipt of such approvals, licenses, registrations and permits could result in cost and time overrun or which could affect our related operations.

Certain Agreements, deeds or licenses and certificates may be in the previous name of the company, we have to apply and update the name of our company in all the statutory approvals and certificates due to the conversion of our Company. Our certain agreements, deeds or licenses and certificates may be in the name of the erstwhile name “Iware Supplychain Services Private Limited” and we would require to update all of them and we have initiated the process to update them all. However, we cannot guarantee that we will be able to update all these in a timely manner and in case of failure to do so, it may affect our company’s business and operations. Further, we may also face legal and financial complications, increased compliance costs, which may have an adverse effect on our company’s financial condition and performance.

These laws and regulations governing us are increasingly becoming stringent and may in the future create substantial compliance or liabilities and costs. While we endeavor to comply with applicable regulatory requirements, it is possible that such compliance measures may restrict our business and operations, result in increased cost and onerous compliance measures, and an inability to comply with such regulatory requirements may attract penalty. For further details regarding the material approvals, licenses, registrations and permits, see “**Government Approvals**” on page no 238 of this Draft Prospectus.

5. Our company depends on third parties to acquire vehicles utilized in our transportation operations. Further, market instability, including changes in fuel costs may adversely impact the company's operations and financial performance.

We rely to a certain extent on third parties for renting vehicles used in the transportation of goods. Dependence on external parties for vehicles increases the likelihood of encountering service disruptions, inconsistencies in quality, and potential disputes. As on the date of this Draft Prospectus, we own 47 Trucks, and any further requirement is managed through leasing the vehicles on a trip-to-trip basis. The company has outsourced a variable number of vehicles, either through leasing arrangements or on a per-trip basis. However, the exact total number of the same cannot be specified.

Further, market volatility, such as fluctuations in fuel prices, poses challenges to managing costs and maintaining profitability. Our limited control over assets may affect our ability to uphold quality standards, adhere to maintenance schedules, and optimize asset utilization, potentially compromising customer satisfaction. Our company relies heavily on the revenue from operations accounted from the transportation segment. Under such transportation segment, direct expenses consist of various components such as fuel expenses, vehicle maintenance cost, taxes and duties for usage of roads and infrastructure. Among these expenses, fuel costs for trucks traversing between states and cities represent the primary component of our transportation expenditures. This uncertainty poses a risk to our profitability, operational results, and cash flows.

6. Our top five states contribute our major revenue for the period ended October 31, 2024, and year ended 31st March 2024, 2023, 2022. Any loss of business from one or more of these states may adversely affect our revenues and profitability.

Our company operates its business operations from its registered office at Ahmedabad, Gujarat and has a presence in North and Central part of India. These states contribute to a substantial portion of our revenues for the period ended October 31, 2024, and year ended on March 31, 2024, 2023 & 2022. Any factors relating to political and geographical changes, growing competition and any change in demand may adversely affect our business. We cannot assure that we shall generate the same quantum of business, or any business at all, from these states, and loss of business from one or more of them may adversely affect our revenues and profitability.

The contribution of top five states to our total revenue is as follows:

The concentration of our business in Gujarat subjects us to various risks, including but not limited to:

- Regional slowdown in construction activities in Gujarat;
- vulnerability to change of policies, laws and regulations or the political and economic environment of Gujarat;
- constraint on our ability to diversify across states; and
- perception by our potential clients that we are a regional construction company, which may hamper us from competing for large and complex work orders at the national level.

7. A major portion of our expenses is incurred in Lorry hire charges that are included in the head “other expenses”. Our Inability to effectively reduce and control these expenses may adversely impact our profitability in the future.

A significant portion of our expenditure is allocated to Lorry hire charges within the category of “Other Expenses”. Failure to effectively manage and minimize these expenses could lead to adverse effects on our future profitability. Further details regarding this expenditure are provided below.

8. We may not be able to acquire warehouses and other logistics facilities in desirable locations that are suitable for our expansion at commercially reasonable prices and our expansion plans may be delayed or affected by various factors.

We generally enter into lease or license arrangements for occupying our warehouses. The growth and success of our business significantly depend on our ability to lease or otherwise obtain rights to use warehouses and other logistics facilities at locations that are suitable for our operations and at commercially reasonable prices.

In particular, the success of our business depends significantly on the infrastructure support in the surrounding area such as access to public roads, highways, ports and airports. As on the date of this Draft Prospectus, we operated an aggregate of 11 warehouses in India. For further information please refer to the chapter titled “**Our Business**” on page no. 111 of this Draft Prospectus.

Our ability to obtain rights to use warehouses and other logistics facilities depends on a variety of factors that are beyond our control such as overall economic conditions, the availability of warehouses and logistics facilities, our ability to identify such properties and competition for such properties. In addition, properties in convenient locations or supported by quality infrastructure may command a premium, which may exceed our budget. The expansion of our warehouses and other logistics facilities may be adversely affected by certain other factors, including, but not limited to:

- Delays in construction or improvements due to factors beyond our control;

- Significant pre-operating costs or capital improvements, work stoppages, strikes or accidents; and
- Inability to invest in equipment, manpower and related assets at our existing and proposed multi-user warehouses that are suitable for our expansion at commercially reasonable prices.
- To the extent that we are unable to obtain rights to use or lease suitable warehouses and logistics facilities within the anticipated time frame or at commercially acceptable prices, our business, financial condition, results of operations and prospects may be materially and adversely affected.

9. *Accidents could result in the slowdown or stoppage of our operations and could also cause damage to life and property.*

We believe that each of our facilities and transport vehicles has adequate equipment to ensure and meet necessary safety standards. However, certain accidents or mishaps may be unavoidable or may occur on account of negligence in complying with prescribed safety standards. Therefore, although we take all necessary steps to ensure safety, accidents, including human fatalities, may occur and there can be no assurance that our safety measures and the precautions undertaken will be completely effective or sufficient. Further, the liability incurred may far exceed the insurance cover. Any accident at our facilities or involving our transport vehicles could also harm our reputation. Such accidents, irrespective of monetary liability, may have an adverse effect on our business and reputation.

10. *Our business is dependent on the road network in India and our ability to utilize our vehicles in an uninterrupted manner. Any disruptions or delays in this regard could adversely affect us and lead to a loss of reputation and/ or profitability.*

The transportation and delivery services we provide are dependent on the road network in India. There are various factors which affect road transport such as political unrest, bad weather conditions, natural calamities, road construction, road quality, regional disturbances, fatigue or exhaustion of drivers, improper conduct of the drivers, accidents or mishaps and negligence. Even though we undertake various measures to avoid or mitigate such factors to the extent possible, some of these could cause extensive damage and affect our operations and/or the condition of our vehicles, thereby increasing our operational costs. Also, any such interruption or disruptions could cause delays in the delivery of goods to their destination and/or also cause damage to transported cargo. We may be held liable to pay compensation for losses incurred by our customers in this regard, and/or losses or injuries sustained by other third parties. Further, such delays and/or damage may cause a loss of reputation, which, over a period of time could lead to a decline in business. In the event that goods to be delivered have a short shelf life, such as perishable goods in our temperature-controlled logistics operations, any delay in the delivery of such cargo could also expose us to additional losses and claims. Although some of these risks are beyond our control, we may still be liable for the condition of such cargo and their timely delivery, and any disruptions or delays could adversely affect us and lead to a loss of reputation and liability in terms of penalty.

Under the terms of certain of our agreements with our customers, we are required to facilitate customers' insurance claims for losses on products in transit and to compensate such customers if we fail to do so. Additionally, in case of damage and loss of goods in transit, we are liable for a certain amount of damaged or lost goods, as mentioned in the agreement with such parties.

In addition, any prolonged or significant downtime of our transportation vehicles or related equipment caused by unforeseen circumstances may cause major disruptions to our operations. In the event we are affected by such prolonged and significant downtime of our vehicles or equipment, our operations and financial performance may be adversely affected.

11. *Our business is affected by prevailing economic conditions in India and indirectly affected by changes in consumer spending capacity in the sectors we serve within India.*

Our business is dependent on overall economic conditions in India and any slowdown or other disruption in the production of goods in India or the Indian economy may negatively affect our business in a number of ways, including our financial condition and results of operations. We are also dependent on the macro-economic conditions of the various sectors we serve. We cater to customers in a wide variety of sectors, including automotive, food and Agro, FMCG, and technology. Any disruption or slowdown in these sectors could negatively affect the logistics spending of our customers. Further, any slowdown in consumer spending capacity in India may negatively affect our financial condition and results of operations, since our operations and financial condition are closely linked to the production and consumption of consumer goods in India. Some of our customers are not suppliers of necessity goods, and, consequently, their goods are subject to high price elasticity, and unfavourable economic conditions may result in a reduction of demand for their goods. A fall in the purchasing power of retail and other end consumers, for any reason whatsoever, including rising consumer inflation, changing governmental policies and a slowdown in economic growth may have an adverse effect on

our customers' revenues, production levels and profitability, and could in turn negatively affect their demand for our services or the terms on which we provide our services to them.

12. We have in past entered into related party transactions and we may continue to do so in the future.

Our Company has entered into related party transactions with our Promoter, Directors and the Promoter Group for the period ended October 31, 2024 and for the year ended March 2024, 2023, 2022. The company undertakes that the related party transactions entered into by the company are in compliance with the provisions of Companies Act, 2013 and all other applicable laws and rules made thereunder. The related party transactions entered by the company for the period ended October 31, 2024, and the year ended March 2024, 2023, 2022 on the basis of restated financials statements.

While our Company believes that all such transactions have been conducted on the arm's length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties.

Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to "**Restated Financial Statements of Related Party Disclosures as Restated**" on page no. 171 respectively of this Draft Prospectus

13. There may be potential conflict of interests between Our Company, Group Company and other venture or enterprises promoted by our promoter or directors.

The main business object/activities of our promoter i.e. Inter India Roadways Private Limited and/or group companies/entities mentioned in the promoter group as tabled below, also permit them to undertake similar business to that of our business, which may create a potential conflict of interest and which in turn, may have an implication on our operations and profits. Conflicts of interests may arise in allocating business opportunities between our Company and Our Group Company/Entities activities in circumstances where our respective interests diverge. Further, our Promoter Group entities are allowed to carry on activities as per their MOA, which are similar to the activities carried by our Group. Further, our Promoter/ Directors and their immediate relatives are Directors on the board of our Promoter Group Entities. This may be a potential source of conflict of interest in addressing business opportunities, strategies, implementing new plans and affixing priorities. In cases of conflict, our Promoter(s) may favour other companies in which our Promoter have interest.

14. The average cost of acquisition of Equity Shares by our Promoters, is lower than the Issue Price of Equity Share.

Our Promoters average cost of acquisition of Equity Shares in our Company is lower than the Issue Price of the shares proposed to be offered through this Draft Prospectus. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer to page no. 61 of this Draft Prospectus.

15. Our Company requires a significant amount of working capital for continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our Company's business operations require a significant amount of working capital. In our business, working capital is often required for our day-to-day business operations including managing freight, forwarding and fuel expenses. In the event we are unable to source the required amount of working capital, we might not be able to efficiently satisfy the demand and preferences of our customers in a timely manner or at all. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect our business.

There exists a substantial requirement of working capital and financing in the form of fund and non-fund based working capital facilities to meet our requirements. The details of our working capital for the projected, estimated and audited period are as follows

(Rs. In Lakhs except the percentage)

Particulars	As at/ For Fiscal	As at/ For Fiscal	As at/ For Fiscal	As at/ For
	2022	2023	2024	31.10.2024
	Actual	Actual	Actual	Actual
Trade Receivables (In ₹ Lakhs)	317.95	828.20	868.33	1,079.41
Revenue from Operations (In ₹ Lakhs)	2,434.63	4,355.45	5,870.63	3,696.91
% of Total Revenue	13.06%	19.01%	14.80%	29.19%
Holding Period for Trade Receivables (In Days)	47	68	53	105

Further as of 31.10.2024, total trade receivables ₹ 1079.41 Lakhs were outstanding against revenue from operations of ₹ 3696.91Lakhs. We may claim for more payments from our clients for additional work and costs incurred in excess of the contract price or amounts not included in the contract price. These claims typically arise from changes in the initial scope of work or from delays caused by the clients. The costs associated with these changes or client caused delays include additional direct costs, such as labour and material costs associated with the performance of the additional work, as well as indirect costs that may arise due to delays in the completion of the project, such as increased labour costs resulting from changes in labour markets.

There may be delays in the collection of receivables from our clients or entities owned, controlled or funded by our customers or their related parties. Because of the nature of our contracts, we sometimes commit resources to assignments prior to receiving adequate payments from clients in amounts sufficient to cover expenditures as they are incurred. From time to time, it may be difficult for us to collect payments owed to us by these clients. In addition, our clients may request for extension of the payment terms otherwise agreed to under respective contracts.

We may not always have the protection of escalation clauses in our agreement or supplemental agreement in respect of the additional work to support our claims. Where we have escalation clauses in our agreements, we may seek to enforce our contractual rights. However, our clients may interpret such clauses restrictively and dispute our claims. These claims are thus often subject to lengthy arbitration, litigation or other dispute resolution proceedings. We cannot assure you that we may be able to recover, in part or full, any such present or future claims. Further, our debtors may have insufficient assets to pay the amounts owed to us even if such proceedings are decided in our favor. In addition, we may incur substantial costs in collecting against our debtors and such costs may not be recovered in full or at all from the debtors. As we often need to fulfill significant working capital requirements in our operations, delayed collection of receivables or inadequate recovery on our claims could materially and adversely affect our business, cash flows, financial condition and results of operations.

16. Excessive dependence on Banks in respect of Loan facilities obtained by our Company.

Our company has been sanctioned term loan and cash credit facilities by different banks. The Company is dependent on such facilities and any default under such arrangement with such lender may create problem for

operation of the Company, which may affect the financial stability of the Company. At the same time this may result into difficulty in arranging for funds for re-payment and may also adversely affect the financial position of the Company.

17. There are certain discrepancies and non-compliances noticed in some of our financial reporting and/or records relating to filing of returns and deposit of statutory dues with the taxation and other statutory authorities such as Ministry of Corporate Affairs, Income Tax and GST.

In the past, our company has at several instances, delayed in filing our ROC, GST, EPF returns and deposit of statutory dues, as a result of which, we have been required to pay the late filing fees long with interest on delayed deposit of due taxes and statutory dues. The details of the same has been mentioned below:

Although the late filing fees and interest on late deposits levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no-show cause notice has been issued against our Company till date, in respect of above. In the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected.

Although no cognizance has been taken by the authority in any of the above matters till date and no notice in respect of same have been served by the concerned authorities including Registrar of Companies till date, we are not sure that no such notice shall be issued in future or at all and in any such event we may be subjected to a

penalty. However, if any action is taken by the concerned authority(ies) in the matter and in the event of any penalty being imposed against the Company by the concerned authority, the financials of the company shall be adversely affected.

As regards corrective measure company has appointed chief financial officer and compliance officer to ensure that all the compliance related matters are taken care of on real time basis and have further intact the internal controls to ensure that the flaws are cured in time.

Company has filed a form MGT-7 on .12.2019 for Financial Year 2018-19 and filed a form MGT-6 on 06.07.2018 which has some clerical errors. Further the company has filed an e-form ADT-1 for second term i.e. for 5 years from 01/04/2018 to 31/03/2023 in which 1st term of 1 year has not been mentioned from 17/01/2018 to 31/03/2018.

Further, our company had not complied with Accounting Standards AS-15 and AS-18 in the past, however the same have been duly complied by the company in the Restated Financial Statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

For further details of certain material legal proceedings involving our Company, our Promoter, our directors, see “**Outstanding Litigations and Material Developments**” on page no. 235 of this Draft Prospectus.

We inadvertently reported an incorrect number of Board Meetings held during the financial years 2021 in our Annual Return, stating that only six board meetings were conducted instead of seven meetings. The Annual Return of the Financial Years 2022 also reflects this error, stating that only six board meetings were conducted instead of seven meetings, since Section 173 of the Companies Act, 2013 mandates a minimum of four board meetings in a Financial Years. As a result, there is a risk of penalty being imposed by the Registrar for noncompliance with Section 173 of the Companies Act, 2013

18. *Some of the details mentioned in the respective KYC and personal Documents of persons forming part of Promoter and promoter group are not same in all KYC documents.*

During the review of KYC documents such as Aadhaar Card, PAN, Passport, Driving License, and Voter ID, discrepancies were identified across certain details. Specifically, inconsistencies were noted in the names of individuals, with the name listed on some KYC documents not matching the names on others. These discrepancies were observed in the KYC documents of certain individuals within the promoter group. However, steps have already been taken to address these issues, and applications have been submitted to rectify the mismatches in the KYC records to ensure consistency and accuracy across all documents.

Further, relevant copies of the education certificates of Krishnakumar Jagdishprasad Tanwar, are not traceable. The information included in the section is based on the affidavits obtained. Consequently, we or the Lead Manager cannot assure you that such information in relation to the particular Director / KMP are true and correct and you should not place undue reliance on the qualification of such Director / KMP included in this Draft Prospectus

19. *Any non-compliance, default or regulatory action on any person or entities belonging to Promoter Group could adversely affect our business reputation and operations.*

In case of imposition of any penalty for any default or non-compliance by any regulatory authority, on the persons or any entities belonging to our Promoter Group on chapter, “**Our Promoters and Promoter Group**” on page no.159 could adversely affect our business operations and reputation. be required to liquidate their shareholding in our Company to settle the claims of the lenders, thereby diluting their shareholding in our Company.

Furthermore, in the event that our Promoters and Directors withdraw or terminate their guarantees, our lenders for such facilities may ask for alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net

Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalation.

Our Proposed Project may be subject to potential problems and uncertainties that such civil work face including cost overruns or delays. Problems that could adversely affect our expansion plans include labour shortages, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory, regulatory approvals, incremental pre-operating expenses, taxes and duties, interest and finance charges and other external factors which may not be within the control of our management.

The Proposed warehouse will require us to obtain various approvals, which are routine in nature. For further details, see “*Objects of the Issue*” on page no. 82. There can be no assurance that we will be able to obtain these registrations and approvals including approvals in relations to power and water procurement in a timely manner or at all. Further, in the event of any unanticipated delay in receipt of such approvals, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly.

24. *Any adverse development affecting the growth of trade volumes and freight rates may have an adverse effect on our business, results of operations and financial condition.*

Our results of operations are affected by the volume of our business, which in turn depends on worldwide trade volumes as well as the import and export volumes in India. Global trade volumes and the import and export volumes in India are significantly affected by changes in global, regional and local economic, financial and political conditions and freight rates that are outside of our control, including as a result of:

- changing economic cycles and other macroeconomic developments;
- the imposition of trade barriers, sanctions, boycotts and other measures;
- significant variations in the exchange rates applicable to currencies in the regions in which our customers operate;
- trade disputes and work stoppages, particularly in the logistics services industry;
- acts of war, hostilities, natural disasters, epidemics or terrorism; and
- changes in freight rates.

Any obstruction in trade with the markets from which we receive cargo, or to which cargo passing through our facilities is shipped, slowing economic growth (due to factors such as economic fluctuations, wars, natural disasters or internal developments such as political realignments) or the imposition of new trade barriers (such as rail, road and other tariffs; minimum prices; political, economic or military sanctions; export subsidies and import restrictions or duties), could lead to lower growth or a decline in the volume of trade and, consequently, to a decline or slower growth in cargo container handling. Given our dependence on the volume of container traffic and freight rates, such developments could have an adverse effect on our business, results of operations and financial condition.

25. *Losses occurred by Group Companies.*

There have been instances in the past few years, where the group Company had incurred losses. Please refer to the title “*Group Company*” on page no. 167 for more information.

26. *Failures in IT systems and infrastructure supporting our system and operations could significantly disrupt our operations and have a material adverse effect on our business, results of operations, cash flows and financial condition.*

Our business relies on the continued and uninterrupted performance of our software and hardware infrastructures. The success of our businesses depends on part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our computer networks may be vulnerable to unauthorised access, computer hacking, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employ subcontractors or third-party vendors. Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our operations and have a material adverse effect on our business, results of operations, cash flows and financial condition.

We may face cyber threats, threats to the physical security of our facilities and employees, the potential for business disruptions associated with IT failures, natural disasters, or public health crises. All our internet facing servers installed at all our data centres as well as at all our offices are also secured with firewalls and intrusion

preventions systems to prevent hacking. If we are unable to protect sensitive information, our customers could question the adequacy of our threat mitigation and detection processes and procedures. Due to the evolving nature of these security threats, the impact of any future incident cannot be predicted.

27. *Our lenders have charge over our movable and immovable properties in respect of finance availed by us.*

We have secured our lenders by creating a charge over our movable and immovable properties in respect of loans/ facilities availed by us from banks and financial institutions. The total amounts outstanding and payable by us as secured loans were Rs. 3237.46 lakhs as on October 31, 2024. In the event we default in repayment of the loans/ facilities availed by us and any interest thereof, our properties may be forfeited by lenders, which in turn could have significant adverse effect on business, financial condition or results of operations. For further information on the “*Financial Indebtedness*” please refer to page no. 230 of this Draft Prospectus.

28. *If we are unable to maintain and enhance our brand and reputation, the sales of our services may suffer which would have a material adverse effect on our business operations.*

Our business depends significantly on the strength of our brand and reputation in marketing and providing our services. We also believe that maintaining and enhancing the “*iWare*” brand, are critical to maintaining and expanding our customer base. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets.

Also, we do not have any control over the registration of a trademark and a trademark may also be opposed by third parties that claim to have prior or superior rights. Such actions are not within our control and can severely impact business and may result in requirement to undertake rebranding exercises, all of which result in additional costs for us and could also impact our reputation. We routinely monitor third party trademarks, including domain names, by keeping a check on the use of our trademarks. However, it is possible that we are not aware of misuse of our trademark and this could potentially cause loss of our reputation, which could impact our business and may even affect our goodwill.

29. *We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.*

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. If we suffer a significant uninsured loss or if insurance claim in respect of the subject-matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected. For further details, please refer chapter titled “*Our Business*” no page no. 111 of this Draft Prospectus.

31. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this Issue. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. For details, please refer to the Chapter titled “*Objects of the Issue*” on page no 82 of this Draft Prospectus.

32. *We have not entered into any long-term contracts with any of our clients.*

We do not have any long-term contracts with our clients and any change in the business pattern of our existing clients could adversely affect the business of our Company. As a result, our customers can terminate their relationships with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products and services. Our Company's customers have no obligation to work with us and may either cancel, reduce, or delay the business. The business by our Company's customers is dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products, customer's inventory management, amongst others. Although we have satisfactory business relations with our clients and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability. Although, we have a strong emphasis on quality, timely delivery of our assignments and personal interaction by the senior management with the customers and suppliers, any change in the buying pattern of buyers and preferences of suppliers can adversely affect the business and the profitability of our Company.

33. *Promoters who are directors as well, hold Equity Shares in our Company and are therefore interested in our company performance in addition to their remuneration and reimbursement of expenses.*

Our Promoters who are directors as well are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see the sections titled "***Our Management***" and "***Our Promoters and Promoter Group***" on page no. 146 and 159 respectively of this Draft Prospectus.

As a result, our Promoters will continue to exercise a significant degree of influence over the Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company. In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

34. *We may be unable to respond to changes in consumer demands and market trends in a timely manner.*

Our success depends on our ability to identify, originate and define product/services and market trends, both on a pan India, international and more local level, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our advertising strategies must also appeal to a broad range of customers whose preferences may vary significantly across regions and cannot be predicted with certainty. We cannot assure you that the demand for our services with end consumers will continue to grow or that we will be able to continue to develop appealing styles or meet rapidly changing consumer demands in the future. If we misjudge the market or fail to anticipate a shift in consumer preferences, we may be faced with a reduction in revenues. Any inability to respond to changes in consumer demands and market trends in a timely manner could have a material adverse effect on our business, financial condition and results of operations.

35. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive, and declaration of dividend will depend upon the financial performance of our Company at the time of declaration. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements (if any) in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past and there can be no assurance that our Company will declare dividends in

the future. For further details, please refer to the chapter titled “*Dividend Policy*” on page no. 170 of this Draft Prospectus

36. *Interest rate fluctuations may adversely affect the Company's business.*

EXTERNAL RISK FACTORS:

47. *Changing laws, rules and regulations and legal uncertainties in India, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. For further details please refer to the chapter “**Government and Other Statutory Approvals**” on page no. 238 for details of the laws currently applicable to us. The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals. Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income

earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see “*Outstanding Litigation and Material Developments*” on page no. 235. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

Any change in Indian tax laws could have an effect on our operations. For instance, the Taxation Laws (Amendment) Ordinance, 2019, a new tax ordinance issued by India’s Ministry of Finance on September 20, 2019, prescribes a number of changes to the income tax rate applicable to companies in India. According to this new ordinance, companies can henceforth voluntarily opt for a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate for Indian companies. Any such future amendments may affect other benefits such as an exemption for income earned by way of dividend from investments in other domestic companies and units of mutual funds, exemption for interest received in respect of tax-free bonds, and long-term capital gains on equity shares if withdrawn by the statute in the future, and the same may no longer be available to us. Any adverse order passed by the appellate authorities/tribunals/ courts would influence our profitability.

The Finance Act, 2022 (“Finance Act”), has, amongst others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax (“DDT”), will not be payable in respect of dividends declared, distributed or paid by a domestic company after 31.03.2020, and accordingly, such dividends would not be exempt in the hands of the shareholders, both resident as well as non- resident and are likely to be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares. Further, the Government of India has notified the Finance Act, 2023, which has introduced various amendments to taxation laws in India. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

48. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

49. *Certain data mentioned in this Draft Prospectus has not been independently verified.*

We have not independently verified data from industry publications contained herein and although we believe these sources to be reliable, we cannot assure that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regard to other countries. Therefore, discussions of matters relating to India and its economy are subject to the limitation that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete or unreliable.

50. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

51. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in this Draft Prospectus.*

While facts and other statistics in this Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “**Industry Overview**” on page no. 101 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

52. *Our business and results of operations could be adversely affected by disruptions in global economic and geo-political conditions.*

As substantially all of our operations are dependent on our customers who have their head offices or parent companies situated outside India, our financial performance and growth are necessarily dependent on economic conditions prevalent globally. The global economy may be materially and adversely affected by political instability or regional conflicts; a general rise in interest rates; inflation; exchange rate fluctuations; changes in tax, trade, and monetary policies; occurrence of natural or man-made disasters; downgrade in debt rating; and adverse economic conditions occurring elsewhere in the world, such as a slowdown in economic growth in China, the repercussions of the United Kingdom exit from the European Union and other matters. While the Indian economy has grown significantly in recent years, it has experienced economic slowdowns in the past due to global economic and geo political conditions. The Indian economy in particular could be adversely impacted by inflationary pressures, currency depreciation, the poor performance of its large agricultural and manufacturing sectors, trade deficits, recent initiatives by the Indian government and other factors. Unfavorable changes in the above factors or in other business and economic conditions affecting our customers could result in a corresponding decline in our business

53. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

54. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company normal business activity. Any deterioration of India physical

infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

55. *Regulatory, economic, political scenarios or other factors that are beyond our control may have an adverse effect on our business and financial performance.*

Our economy and its securities markets are influenced by economic developments, any adverse economic developments or rising of fiscal or trade deficit may also affect investor confidence and cause increased volatility in securities markets and indirectly affect our economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition, and results of operations. Further financial disruption could also have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares

Also, a change in the government or change in deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business and high rates of inflation could increase our costs without proportionately increasing our revenues.

56. *Natural disasters, epidemics, pandemics, acts of war, terrorist attacks and other events could materially and adversely affect our business and profitability.*

Natural disasters (such as earthquakes, fire, typhoons, cyclones, hurricanes and floods), pandemics, epidemics, strikes, civil unrest, terrorist attacks and other events, which are beyond our control, may lead to global or regional economic instability, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations. Any of these occurrences could cause severe disruptions to our daily operations and may warrant a temporary closure of our facilities. Such closures may disrupt our business operations and adversely affect our results of operations. Our operation could also be disrupted if our clients are affected by such natural disasters or epidemics. An outbreak or epidemic, such as SARS, the H1N1 and H5N1 viruses or COVID-19 could cause general consumption or the demand for various products to decline, which could result in reduced demand for our services. Such an outbreak or epidemic may significantly interrupt our business operations as health or governmental authorities may impose quarantine and inspection measures on us or our clients.

Moreover, certain regions in India have witnessed terrorist attacks and civil disturbances and it is possible that future terrorist attacks or civil unrest, as well as other adverse social, economic and political events in India could have a negative effect on us. Transportation facilities, including vehicles, can be targets of terrorist attacks, which could lead to, among other things, increased insurance and security costs. Regional and global political or military tensions or conflicts strained or altered foreign relations, protectionism and acts of war or the potential for war could also cause damage and disruption to our business, which could materially and adversely affect our business, financial condition, cash flows and results of operations. Such incidents could create the perception that investments in Indian companies involve a higher degree of risk, and such perception could adversely affect our business and the price of the Equity Shares.

57. *Instability in financial markets could materially and adversely affect our results of operations and financial condition.*

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

58. *Changing regulations in India could lead to new compliance requirements that are uncertain.*

The regulatory environment in which we, and our key customers, operate is evolving and is subject to change. The Government of India may implement new laws or other regulations that could affect the logistics industry or

the sectors we serve, which could lead to additional compliance requirements. Additional compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which additional requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations.

Justification for holding period levels

Particulars	Details
Trade Receivables	<p>The company's trade receivables have shown varying trends over recent years. In FY 2022, the debtor days were at 47 days, which increased to 68 days in FY 2023 before decreasing to 53 days in FY 2024. However, as of October 31, 2024, debtor days surged to 105 days. The sales of the company till October 31, 2024 is Rs 36.96 Cr and in the month of October itself the sales of the company was Rs 728.85 lakhs, leading to higher end of trade receivables standing at the end of October 31, 2024. Typically, the company's receivable period ranges between 2-3 months. During the peak season (October to February), it can stretch to around 3 months, while in other periods, it generally remains closer to 2 months. For FY 2025, the average debtor days are projected to stabilize around 2 months (66 days). However, for FY 2026, the company anticipates a rise in trade receivable days to approximately 2.5 months (75 days). This is still within the historical range of 2-3 months.</p> <p>The increase in debtor days for FY 2026 is attributed to:</p> <ol style="list-style-type: none"> 1. Onboarding new clients – The projected increase in trade receivable days to approximately 2-2.5 months in FY 2026 is driven by the company's strategies to onboard new clients. When acquiring new clients, the company often provides more flexible credit terms to build trust and establish lasting relationships. These extended terms can temporarily lengthen the payment cycle, as new clients may take time to adapt to the company's invoicing and payment processes. Additionally, the increased volume of sales to these clients contributes to higher trade receivables during the initial stages of the relationship. 2. Regional expansion – Regional expansion further contributes to the increase in debtor days. Entering new markets often requires offering competitive credit terms to attract clients unfamiliar with the company, effectively lengthening the payment period. In some regions, localized challenges, such as slower payment cycles due to economic conditions or local trade practices, can also impact receivables. Moreover, the operational complexities of managing invoicing and collections across diverse markets may lead to temporary delays in cash flow conversion. Despite the temporary extension in debtor days, these strategies are part of the company's long-term growth plan to strengthen its client base and establish a robust presence in new regions.
Trade Payables	<p>The company's trade payable days have fluctuated over recent years. In FY 2022, creditor days stood at 44 days, increasing to 52 days in FY 2023 before dropping significantly to 31 days in FY 2024. As of October 31, 2024, creditor days remained relatively stable at 35 days. Historically, the company's trade payable days typically range between 1 to 1.5 months. However, the company plans to reduce this average to just 15 days for the projected years of FY 2025 and FY 2026.</p> <p>Reason for decrease in the trade payable days in projected year of FY 2026 is as follows:</p> <ol style="list-style-type: none"> 1. Decrease in Dependency on Third-Party Vendors for Vehicles: The company intends to decrease its dependence on external vendors for vehicle-related services. With the expansion of its own fleet, the need for third-party services is reduced, leading to lower payables. This strategy also facilitates improved cost control and quicker payment cycles. 2. Labour Contractor: The company hires labour on a contractual basis based on its needs and seasonal requirements. Typically, the company pays the vendors within a month, but it is considering shortening the payment timeline to 7 days on an average to strengthen its relationships with the vendors. As the company's sales grow, it will rely more on its vendors for support during the peak season.

3. General Corporate Purpose

Our management, following the policies established by our Board, has the flexibility to allocate the proceeds designated for general corporate purposes. We plan to use the remaining Fresh Issue proceeds, totalling ₹ [●] Lakhs, for general corporate purposes to support business growth. In line with our Board's policies, we have the discretion to apply the remaining Net Proceeds for various general corporate purposes, including but not limited to covering operating expenses, initial development costs for non-identified projects, strategic initiatives, addressing unforeseen contingencies in the normal course of business, or any other purposes approved by the Board of Directors, in accordance with the Companies Act, 2013.

We confirm that any issue related expenses shall not be considered as a part of General Corporate Purpose. Further, we confirm that in terms of Regulation 230(2) of the SEBI ICDR Regulations, 2018, the extent of the Net Proceeds according to this Draft Prospectus, proposed to be used for general corporate purposes shall not exceed 15% of the gross proceeds of our Company through the Issue of Equity Shares.

GLOBAL ECONOMIC OUTLOOK:

Global Growth: The pace of economic expansion is slow by historical standards, due to both short-term factors, such as high borrowing costs and the withdrawal of fiscal support, and long-term effects from the COVID-19 pandemic and Russia's invasion of Ukraine. Additionally, weak productivity growth and increasing geo-economic fragmentation contribute to this slowdown. The World Economic Outlook forecasts that the global economy will continue to grow at a rate of 3.2 percent in 2024 and 2025, maintaining the same pace as in 2023. A slight increase in growth for advanced economies—rising from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025—will be counterbalanced by a modest slowdown in emerging market and developing economies, from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now is 3.1 percent, the lowest in decades. Global inflation is expected to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies reaching their inflation targets sooner than emerging market and developing economies.

For Developed economies: growth is projected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025. The forecast is revised upward by 0.2 percentage point for 2024 compared with the January 2024 WEO Update projections and remains the same for 2025. The 2024 upgrade reflects a revision to US growth, while an upward revision to the US broadly offsets a similar downward revision to the euro area in 2025.

✚ **In the United States,** growth is projected to increase to 2.7 percent in 2024, before slowing to 1.9 percent in 2025, as gradual fiscal tightening and a softening in labor markets slow aggregate demand. For 2024, an upward revision of 0.6 percentage point since the January 2024 WEO Update reflects largely statistical carryover effects from a stronger-than-expected growth outcome in the fourth quarter of 2023, with, in addition, some of the stronger momentum expected to persist into 2024.

Growth in emerging and developing Asia is expected to decrease from an estimated 5.6 percent in 2023 to 5.2 percent in 2024 and 4.9 percent in 2025, representing a slight upward revision compared to the January 2024 World Economic Outlook (WEO) Update. China's growth is projected to slow from 5.2 percent in 2023 to 4.6 percent in 2024 and 4.1 percent in 2025, as the positive effects of temporary factors—such as the post-pandemic boost to consumption and fiscal stimulus—diminish and weakness in the property sector continues. Meanwhile, India's growth is projected to remain robust at 6.8 percent in 2024 and 6.5 percent in 2025, driven by strong domestic demand.

INDIAN ECONOMY OUTLOOK:

Gross Domestic Product (GDP): The real GDP growth rate is estimated to be 8.2% in FY24 compared to the growth rate of 7.0% in FY23, while the real GDP in fourth quarter of 2023-24 is estimated to grow by of 7.8%, indicating the sustenance of growth momentum in the financial year. These estimates reaffirm the ability of the Indian economy to grow on the robustness of its domestic demand even when a rise in global uncertainties slows global output. In the fiscal year 2024-25 (Union Budget Estimate), there has been a 11.1% increase in the allocation for capital expenditure, rising from Rs. 10 lakh crores (US\$ 120.6 billion) in the previous year (2023-

24) to Rs. 11.11 lakh crore (US\$ 134 billion). The strong growth of the Indian economy in the first half of FY24 has surpassed that of major economies, contributing to the reinforcement of macroeconomic stability.

The nation has shifted to a modern economy, demonstrating increased global integration, and exporting a fifth of its output, a significant rise from one-sixteenth at independence. The demographic transition, marked by a lower infant mortality rate and a consistent growth in literacy rates, further enhances India's advantageous position. With improved income distribution, heightened employment rates, and globally competitive social amenity provisions, there is potential for India's per capita GDP to expand in the next 25 years, mirroring the growth seen in the preceding 75 years.

MARKET SIZE

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 173.82 lakh crores (US\$ 2.08 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world.

The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

ROAD AHEAD

The momentum of economic growth observed in the first quarter continued into the second quarter of FY24, with high-frequency indicators showing positive performance in July and August 2023. India maintained a strong position in the external sector, evidenced by its 5th ranking globally in foreign direct investment inflows during the first quarter of 2022. This favorable position underscores India's optimistic economic growth and increasing employment opportunities.

The economic narrative during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in Revised Estimates (RE) 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crores (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crores (US\$ 133.27 billion).

India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The Consumer Price Index for Consumer (CPI-C) inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of

administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

LOGISTICS, WAREHOUSING, FREIGHT FORWARDING SERVICES INDUSTRY OUTLOOK

"Freight forwarding and logistics services" encompass a broad range of activities related to the transport of goods, whether by single or multiple modes of transportation. These services include the consolidation, storage, handling, packing, or distribution of goods, along with ancillary and advisory services such as customs and fiscal management, declaration of goods for official purposes, arranging insurance for the goods, and handling payment or related documents. Freight forwarding extends to incorporate logistics services that utilize advanced information and communication technology to manage the transport, handling, or storage of goods, essentially overseeing the entire supply chain management process. These services are designed to be adaptable to suit the specific requirements of each client.

Freight forwarding plays a crucial role in facilitating global trade, ensuring that goods are efficiently transported from their origin to their destination. The key objectives of a freight forwarder are to ensure that goods arrive:

- at the right place,
- at the right time,
- in perfect condition, and
- at the most cost-effective price.

To accomplish this, expertise is required in a number of different areas

- Logistics:** Effective logistics require close collaboration with transporters across all modes- road, rail, sea, and air. Freight forwarders are continually engaged in negotiating freight rates and service terms with transportation providers. They analyze the costs of transporting cargo through different routes and modes to devise logistics chains that offer an optimal balance between cost, speed, and reliability.
 - Regulatory Compliance:** Navigating the complexities of international trade requires adherence to numerous regulatory measures and procedures, particularly those related to customs and security. The expertise and specialized knowledge of freight forwarders are critical in this area, helping to ensure compliance and smooth trading across global markets.
 - Risk Management:** International trade introduces various risks, necessitating more sophisticated management tools compared to local transactions. Forwarders must provide advice and assistance in mitigating risks associated with the movement of goods, such as loss, damage, or destruction. Given their extensive exposure to the international market, forwarders are also valuable resources for managing credit and currency risks.
 - Finance and Payment:** Forwarders handle goods often sent between parties who are not directly acquainted, making it crucial to meticulously ensure all aspects of the door-to-door operation are compliant, particularly in producing accurate and timely documentation. Proficiency in this area ensures prompt financial settlements for transactions and results in satisfied traders. Freight forwarders also play a key role in guiding new exporters and importers into markets, often advising on alternative financing options and establishing payment methods that benefit all involved parties.
 - Cross Functional Integration:** Freight forwarders are in a great position to help companies who focus more on their main work and outsource other tasks, the role of freight forwarders becomes very important. They are skilled at making sure goods move smoothly and efficiently from one place to another, from the time an order is placed until it is delivered to the final receiver. This skill helps increase the value of the products being shipped.

OVERVIEW AND GROWTH OF INDIA'S LOGISTIC SECTOR

The Indian logistics sector is one of the largest in the world and presents a huge addressable opportunity. The sector is critical for the country's economic growth as it connects various elements of the economy and consists of transportation, warehousing, and other supply chain solutions ranging from suppliers to end customers. The Department of Commerce set up a logistics division in July 2017 to oversee the integrated development of the sector. Led by the Special Secretary to the Government of India, the division aims to enhance the sector by devising action plans for policy reforms and process enhancements, addressing challenges, and embracing technology.

The Indian economy, ranked fifth globally with a GDP of approximately US\$ 3.7 trillion in 2023, experienced rapid growth from 2015 to 2019, with an average annual growth rate exceeding 7%. However, due to strict COVID-19 lockdowns, GDP fell by 7.3% in 2020. A robust recovery followed in 2021 and 2022, driven by a

resurgence in the service sector, revitalization of manufacturing, and growth in agriculture, leading to an impressive overall growth of 15.3% over those two years. The manufacturing sector, which made up 15.3% of GDP in FY22, is set to expand further, supported by the government's initiatives to promote the 'Make in India' campaign and its goal to transform India into a global manufacturing hub. This shift in manufacturing bases is expected to benefit India substantially, as emerging global trends present unique opportunities for the country to develop first-class infrastructure and attract companies looking to establish operations, positioning India as a premier global manufacturing centre. To support this growth in manufacturing, there is a need for efficient and technologically advanced supply chain solutions. India is well-positioned to serve as a reliable supply chain partner for both domestic and international markets by providing sophisticated and efficient supply chain services. With ongoing technological advancements, India is also enhancing its logistics sector by integrating technological solutions to automate and optimize processes. Over the past five years, India has consistently improved its position in various global manufacturing and business indices, including a six-place rise to 38th out of 139 countries in the Logistics Performance Index.

India's logistics are estimated to account for about 14.4% of GDP. More than 22 million people rely on it for their income. In 2019, the Indian logistics sector was valued at Rs. 15.1 lakh crore (US\$ 190 billion). The unorganised sector amounts to 99% of the logistics sector that includes owners of less than five trucks, brokers or transport companies' affiliates, small-scale warehouse owners, customs brokers and freight forwarders, among others. The global indices reflect the progress and developments in trade-related logistics over the years. The development of the logistics sector is also reflected by the fact that India scored 90.3% in the United UNESCAP's Global Survey on Digital and Sustainable Trade Facilitation conducted in 2021, which is an exceptional improvement from the score it secured in 2019 of 78.5%, brought about by gains in the scores of five important indicators. The score has shown a consistent improvement, with scores of 63.4% and 67.7% secured in 2015 and 2017, respectively.

As depicted in the above pie chart (left), representing the segment-wise breakup of the logistics sector in FY21. Roads have the largest percentage share of 73% followed by rail (18%), water (5%) and air (5%).

OVERVIEW OF GROWTH OF INDIA’S WAREHOUSING SECTOR

The warehousing, industrial, and logistics (WIL) sectors are projected to be crucial for attaining India’s vision of being a US\$ 5 trillion economy by FY25. The warehouse and logistics industry have benefited the most from the COVID-19 epidemic, increasing its share from 2% in 2020 to 20% in 2021. Because of the growing shift from discretionary to essential internet buying during the COVID-19 epidemic, the e-commerce industry became more appealing and attractive. The expansion of this industry is likely to be aided by a robust economy, government efforts to improve infrastructure, and a favourable business environment. Increasing consumerism and a huge consumer base are fostering the growth of retail and e-commerce in India. The Indian retail sector’s market size is predicted to increase at a CAGR of 9% between 2019 and 2030, totalling more than US\$ 1.8 trillion.

The Government of India has taken many initiatives to strengthen the sector’s infrastructure, including the establishment of dedicated freight corridors and the extension of road and rail networks, to improve connectivity and decrease travel times. Another critical governmental intervention has been the sector’s digital transformation, projects such as Digital India, Bharat Net, and the National Logistics Portal would aid in the industry’s digitization. Furthermore, the government has announced the establishment of logistics parks and warehouses across the country to provide appropriate storage facilities for enterprises. The warehouse sector has grown rapidly in recent years, fuelled by the expansion of e-commerce, solid infrastructure, the adoption of GST, and the advent of organized retail. The recently implemented National Logistics Policy intends to reduce India’s logistics costs from the double digits of GDP to the single digits by 2030.

The Indian warehousing market is predicted to reach US\$ 34.99 billion (Rs. 2,872.10 billion), expanding at a CAGR of 15.64% from 2022 to 2027. Modern warehouse facilities and technology-driven solutions have changed the warehousing sector in India in recent years. With increased demand and supply throughout the years, the Indian warehousing industry is gaining traction. The key players are third-party logistics (third-party logistics) and e-commerce enterprises, which are growing into tier 2 and 3 cities and eventually increasing their proportion of secondary marketplaces. Businesses are transitioning to a hub-and-spoke model while also implementing technology to simplify operations, with an eye on the larger picture of ease, efficiency, and sustainability.

In 2021, data shows that India experienced a 21% year-over-year growth in the combined inventory of Grade A and B warehouse spaces across its eight major cities. By the end of that year, the total warehousing capacity was projected to reach 287 million square feet, an increase from 238 million square feet in the previous year. The Grade A warehouse space alone accounted for 134 million square feet, with a five-year compound annual

growth rate (CAGR) of 29.9%. Delhi NCR, Mumbai, and Bengaluru, as the three largest cities, housed over half of this warehousing capacity.

According to the data presented in the subsequent pie chart, the 3PL/Logistics sector has led in warehouse space demand over the past five years. The e-commerce sector, spanning retail, groceries, pharmacy, and food delivery, is expected to see significant growth as consumer behaviour has shifted increasingly from in-store to online shopping. The COVID-19 pandemic has further accelerated this trend, boosting online orders for both essential and non-essential goods. While the manufacturing demand in sectors like Auto & Ancillaries and Engineering has seen a decline during the pandemic, there has been a rise in demand from other consumer-driven sectors such as Retail and FMCG.

GOVERNMENT INITIATIVES

India's logistics and supply chain industry are experiencing a major transformation, led by several government initiatives aimed at boosting the sector. Notably, implementing GST and recognising logistics as infrastructure status are two critical moves that have been instrumental in driving this change. Initiatives that have been implemented to streamline goods movement and reduce turnaround times are listed below.

1. **Dedicated freight corridors:** To facilitate the seamless transportation of goods and commodities across India, high-speed, large-capacity railway corridors – known as dedicated freight corridors – have been established. These corridors integrate state-of-the-art technology and improved infrastructure, promising enhanced efficiency, and effectiveness in logistics operations. As of January 2023, 1,724 kilometres of dedicated freight corridors have been completed. These corridors connect Delhi, Mumbai, Chennai, and Howrah, which are already part of the Indian Railways Network.
2. **Multi-Modal logistics Parks:** The development of multi-modal logistics parks is a strategic step towards providing comprehensive freight-handling facilities. Spread across at least 100 acres, these parks offer access to various modes of transportation, including road, rail, and air. They also provide advanced storage solutions such as mechanised warehouses, cold storage facilities, and essential services like customs clearance and quarantine zones. These parks aim to optimise logistics operations and enhance overall supply chain efficiency by lowering freight costs, warehouse expenses, and vehicle congestion. Multi-modal logistics parks have been established at 35 important strategic sites, with a total investment of Rs. 50,000 crores. These parks facilitate smooth transportation of goods using various modes of transport.

4. **Warehousing Policy:** The government's warehousing policy focuses on creating exclusive warehousing zones through public-private partnerships in order to reduce transportation and logistics costs and accelerate growth. INVESTMENT TRENDS

Foreign companies are increasingly investing in India's logistics infrastructure, drawn by the country's strategic position, skilled workforce, and enhanced business climate. The expansion of industrial and logistics parks, along with data centres, has become a significant focus in the Indian real estate market. In 2022, these sectors attracted US\$ 1.8 billion in Private Equity (PE)/Venture Capitalist (VC) investments, marking a 29% increase from the previous year. Early in 2022, the industry secured investments totalling US\$ 1 billion (Rs. 8,257 crore). The average quarterly investment in the logistics and industrial sectors was approximately 1.3 times higher in 2021 than in the previous year, which saw US\$ 335.69 million (Rs. 2,755 crore) in investments. From 2019 to 2022, the warehouse and logistics sectors amassed US\$ 5.4 billion in institutional investments, with 2022 alone accounting for 35% of this total.

Investments in warehouses represented the second-largest share of institutional real estate investments in 2021 and 2022, comprising 27% and 31% respectively, surpassing other sectors like residential and retail. Between 2019 and 2022, the western region of India, notably Mumbai, Pune, and Becharji (a small town in Gujarat), received the second-largest share of institutional investments in warehousing, contributing to 35% of the total investment in the sector. This underscores the growing investor confidence in India's Tier II cities.

ROAD AHEAD

India's warehousing and logistics sector is vibrant and expanding swiftly, poised to become a critical component of the nation's economic development. While the sector faces some hurdles, it is strategically positioned for sustained growth, offering attractive prospects for both investors and companies. Driven by governmental initiatives to bolster infrastructure and the burgeoning e-commerce industry, this sector is anticipated to significantly fuel India's economic expansion. Additionally, the increasing integration of technology and the government's encouragement of a digital economy provide substantial opportunities for logistics companies to adopt data analytics, artificial intelligence, and machine learning to enhance operational efficiencies and customer service. Furthermore, there are considerable investment opportunities for international firms aiming to enter India's flourishing logistics market. The government has facilitated this by permitting 100% foreign direct investment in logistics parks and warehouses, making it easier for foreign entities to invest in this sector.

As the Indian logistics industry confronts challenges, the road ahead demands strategic initiatives. Fostering technological integration, embracing sustainable practices, and fortifying last-mile connectivity are imperative. Collaborations across sectors, including the government, private enterprises, and technology providers, would be pivotal for holistic advancement. Investment in skill development and infrastructural enhancements would further propel efficiency. By navigating regulatory complexities, adopting innovative solutions, and cultivating a responsive ecosystem, India's logistics sector can not only overcome existing challenges but also emerge as a resilient and globally competitive force, contributing substantially to the nation's economic growth in the foreseeable future.

The warehousing process at Iware follows a well-structured workflow, which includes the following key steps:

Warehousing Process

- a) **Material Inward:** Goods arrive from the client and are stored into the warehouse using a Stock Transfer Note (STN). Each item is checked and recorded to ensure accuracy.
- b) **Storage:** After receiving and recording, items are stored in designated locations within the warehouse, making them easily accessible for order processing.
- c) **Order/ Bill Receiving:** Upon receiving an order or bill from the client, the operations team initiates the order fulfilment process.
- d) **Order Processing:** The warehouse team prepares to fulfil the order by locating and organizing the items for dispatch.
- e) **Picking and Loading:** Once the designated authority approves the order, the approved items are picked and the team start preparing them on the loading dock. The transportation team assigns a vehicle to the order and positions it for loading.
- f) **Dispatching to Distributor:** The loading team carefully loads the vehicle, and, after a final cross-check by the supervisor, the necessary documents are prepared, and the vehicle is released for dispatch.
- g) **Proof of Delivery (POD):** At the final destination, the driver obtains a signature and stamp from the distributor on the Logistics Receipt, which is then submitted back to the transportation team to close the transaction.

Throughout this process, Iware's team handles all necessary tasks, including loading, unloading, packing, barcoding, billing, and dispatching. This organized system ensures each step in the warehousing process is managed effectively to meet the client's requirements.

B. Transportation and Carrying Forwarding Agent Services:

Our core offerings include acting as Carrying & Forwarding Agents to clients. Our service includes receiving goods from client locations/ warehouses/ railway sidings, etc., unloading and inspecting them and transporting those goods to instructed warehouses/ locations. Thereafter, we store these goods in our warehouses. Subsequently, we ensure timely dispatch of the goods to their designated destinations as per our clients' requirements.

Iware offers a comprehensive range of Transportation and Rail Logistics services that emphasize efficiency and reliability. Using a well-coordinated network of road and rail transportation, Iware facilitates the smooth movement of goods throughout the supply chain. The service encompasses first-mile loading and last-mile unloading, enabling secure and effective product delivery.

At the core of Iware's transportation services include fleet of 47 vehicles out of which 15 vehicles are of 22 Feet Open Body and remaining are 32 Feet Containers. To scale operations and address high-demand requirements, Iware collaborates with allied Group Company and also hire the vehicles from local vendors as and when required. The extensive network allows the company to effectively handle PAN India deliveries. This approach helps to address the diverse transportation needs of clients.

Iware offer two types of options:

- a) **Full Truck Loading:** Full Truck Loading (FTL) provides clients with exclusive access to an entire truck for a single shipment. This option is suitable for businesses that need to transport large quantities of goods or high-priority shipments that require a dedicated vehicle. With FTL, the shipment travels directly from the loading point to the destination without additional stops for loading or unloading other shipments, which helps reduce transit time and handling.

FTL is particularly valuable for industries needing high-volume shipments delivered with minimal handling. This service option helps minimize the risks associated with loading and unloading, allowing goods to move quickly along a direct route, which can support faster delivery schedules and optimized logistics planning.

- b) **Container Load:** Iware's Container Load service includes comprehensive handling of goods in containers, with the added option of transport via rail cargo for long-distance shipments. This service is ideal for clients who require secure and efficient movement of bulk or high-volume goods across significant distances.

The process begins with the loading of goods in containers directly from designated locations and delivery to the customer location. The goods are carefully loaded and packed within the container to prevent damage during

transport. For rail cargo, containers are loaded into Rake at designated rail terminals, ensuring secure placement for a stable journey. This intermodal approach allows for efficient handling across both rail and road networks, making it particularly cost-effective and suitable for large shipments.

Each shipment is monitored to maintain high standards in service delivery, with tracking mechanisms in place to provide updates on the location and estimated arrival time of the goods. In addition, the company's transportation team coordinates with the warehousing and loading teams to ensure a streamlined experience for clients. At the final destination, Iware's unloading process completes the transportation cycle, carefully placing goods as per client requirements and handing over all necessary documentation. The approach to transportation helps reduce transit times and optimize resource allocation, making it an integral part of Iware's service offering.

C. Rake Handling Services:

Iware provides rake handling services, which cover the entire process of transporting goods from the company to rake sidings and then managing their transfer via rail. This process involves several key stages:

Rake Handling Process

- a) **Customer Request and Indent Filing:** The process begins with a client request for a rake, followed by indent filing to arrange for rake placement at the railway siding.
- b) **Transportation to Rake Siding:** Goods are transported from to the designated rake siding, where they are prepared for rail loading.
- c) **Loading into Wagons:** The team oversees the secure loading of goods into railway wagons, ensuring that the items are safely stored for rail transport.
- d) **Unloading at Destination:** Once the rake reaches its destination, the goods are unloaded and inspected to verify the material.
- e) **Delivery to Distributors:** The goods are then delivered to the final distributors as per the instruction provided by the client, maintaining alignment with client instructions.
- f) **Proof of Delivery (POD):** Finally, a POD is obtained from the distributor, confirming that the goods have been delivered successfully. This document is submitted to complete the transaction.

D. Business Auxiliary Services

Iware offers specialized Business Auxiliary Services designed to support Original Equipment Manufacturers (OEMs) in managing their production and assembly needs efficiently. This service allows clients to outsource specific manufacturing processes, such as assembly.

At the Karsanpura unit in Gujarat, Iware manages assembly line operations for clients. The process begins with the receipt of child parts from third-party suppliers. These parts are then organized according to the client's specifications, ensuring that each component is correctly identified and allocated. Using assembly lines set up by the client, Iware's team assembles pistons or other components, taking care to meet stringent quality standards.

The auxiliary service is designed to integrate smoothly with the client's supply chain. Once the assembly process is complete, the finished parts are packed and prepared for shipment according to the client's billing instructions. Iware manages all logistical aspects of the service, from receiving the raw components to assembling and dispatching the finished products. The transportation team coordinates the dispatch, ensuring that products are delivered on schedule to the specified destinations. This close attention to detail helps Iware's clients achieve timely production targets and maintain consistent product quality.

By providing end-to-end support in assembly, Iware enables OEMs to streamline their operations, reduce overhead costs, and focus on their core business. This collaborative approach strengthens Iware's role as a valuable partner in the manufacturing supply chain, aligning with client goals and enhancing overall efficiency in production.

PM Gati Shakti – National Master Plan for Multi-modal Connectivity

Pursuant to the budget announcement for the Financial Year 2021-22 by the Minister of Finance, the ‘PM Gati Shakti – National Master Plan for Multi-modal Connectivity’ (“NMP”) was introduced. The NMP aims to facilitate the last mile connectivity of infrastructure and also reduce travel time for people. This is proposed to be implemented as a digital platform to bring 21 ministries together for integrated planning and coordinated implementation of infrastructure connectivity projects. The approach is driven by seven engines, namely, roads, railways, airports, ports, mass transport, waterways, and logistics infrastructure for economic transformation, seamless multimodal connectivity, and logistics efficiency. The NMP seeks to benefit the logistics industry by bringing in data exchanges among all mode operators on a ‘unified logistics interface platform’, designed for ‘application programming interface’. The multi-modal connectivity will provide integrated and seamless connectivity for movement of people, goods and services from one mode of transport to another.

The Cabinet Committee on Economic Affairs accorded approval for the implementation of the NMP on October 21, 2021. An Empowered Group of Secretaries (“EGoS”) under the chairmanship of the cabinet secretary has been constituted for monitoring the NMP and for approving any changes in the NMP to meet any emerging requirements. The NMP also provides for an Integrated Multimodal Network Planning Group with heads of network planning division of all connectivity infrastructure ministries and departments. The NPG is responsible for unified planning and integration of the proposals and assist the EGoS in respect of its mandate.

The National Logistics Policy 2022

The National Logistics Policy 2022 (“NLP”) was approved by the union cabinet on September 21, 2022, in furtherance to the NMP. While the NMP is directed towards development of integrated infrastructure and

network planning, the NLP provides for efficiency in services (processes, digital systems, regulatory framework) and human resource. Key objectives of the NLP are:

- **Integration:** to promote inter-modality, multi-modality through seamless integration of processes, digital systems, policies and legislative requirements.
- **Optimization:** to promote and ensure optimal utilisation of logistics infrastructure through synergetic usage.
- **Standardization:** of physical assets, processes, taxonomy, benchmarking of service quality standards, in the logistics sector.
- **Modernization:** to promote greater adoption of information communication technology, upgraded infrastructure, use of drones, automation, innovation, green logistics, international best practices and facilitate integration with global value chain.
- **Formalisation:** to reduce fragmentation in the sector, promote excellence, mainstream logistics in higher education, upskilling and re-skilling of existing workforce.
- **Democratization:** to promote inclusivity by addressing needs of logistics supply and user side (agriculture and manufacturing sector and internal and external trade) and encourage public private participation. As a strategy to reduce logistics costs, the NLP proposes to (i) improve efficiency of transport systems through promoting development of multimodal interconnected infrastructure; (ii) improve warehousing through development of warehouses with optimal spatial planning and facilitating private investment in warehouses; (iii) improve inventory management through improvements in reliability of supply chains through promotion of digitalisation in different aspects of inventory management; and (iv) improve efficiency in regulatory matters and order processing to facilitate development of a regulatory and policy environment wherein government policies would not act as an impediment to infrastructure development in the country, and also to promote and support investments by all stakeholders including the private sector.

It proposes a Unified Logistics Interface Platform (“ULIP”) and a Logistics Ease Across Different States (“LEADS”) study as key strategies to achieve the target of developing data driven systems logistics ecosystems. Monitoring and coordination of the NLP has been entrusted to the EGoS created under the NMP. The EGoS will set-up a special Services Improvement Group (“SIG”) for monitoring of improvements pertaining to processes, regulatory and digital improvements in logistics sector. A Comprehensive Logistics Action Plan (“CLAP”) has been introduced as part of the NLP. The CLAP proposes solutions for specific key action areas, which, inter alia, include (i) integrated digital logistics systems, (ii) standardization of physical assets and benchmarking service quality standards, (iii) logistics human resources development and capacity building, (iv) state engagement, (v) EXIM (Export-Import) logistics, (vi) service improvement framework, (vii) sectoral plan for efficient logistics and (viii) facilitation of development of logistics parks.

One of the key action areas under the NLP is development of Sectoral Plans for Efficient Logistics (“SPEL”). The SPEL would address logistics issues pertaining to infrastructure, processes, digital improvements, policies and regulatory reforms, capacity building for better workforce, and cross-sectoral cooperation. According to the NLP, each of the key nodal ministries, including Ministry of Railways, Ministry of Roads and Highways and Ministry of Ports, may consider developing a SPEL within six months from the date of the NLP coming into the Force.

The Industrial Relations Code, 2020

The Government of India enacted 'The Industrial Relations Code, 2020' which received the assent of the President of India on September 28, 2020. The provisions of this code will be brought into force on a date to be notified by the Central Government. INTELLECTUAL PROPERTY RIGHTS

Intellectual property in India enjoys protection under both common law and statutes. Under statutes, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957 and trademark protection under the Trade Marks Act, 1999. These enactments provide for the protection of intellectual property by imposing civil and criminal liability for infringement. In addition to the domestic laws, India is party to several international intellectual property related instruments including the Patent Cooperation Treaty, 1970, the Paris Convention for the Protection of Industrial Property, 1883, the Berne Convention for the Protection of Literary and Artistic Works, 1886, the Universal Copyright Convention adopted at Geneva in 1952, the International Convention for the Protection of Performers, Producers of Phonograms and Broadcasting Organizations, 1961 and as a member of the World Trade Organisation is a signatory to the Agreement on Trade Related aspects of Intellectual Property Rights.

The Trade Marks Act, 1999 ("Trade Marks Act")

The Trade Marks Act governs the statutory protection of trademarks and prevention of the use of fraudulent marks in India. Indian law permits the registration of trademarks for both goods and services. Under the provisions of the Trade Marks Act, an application for trademark registration may be made with the Trade Marks Registry by any person or persons claiming to be the proprietor of a trade mark, whether individually or as joint applicants, and can be made on the basis of either actual use or intention to use a trademark in the future. Once granted, a trademark registration is valid for 10 years unless cancelled, subsequent to which, it can be renewed. If not renewed, the mark lapses and the registration is required to be restored to gain protection under the provisions of the Trade Marks Act. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides for penalties for infringement, falsifying and falsely applying trademarks among others. Further, pursuant to the notification of the Trade Marks (Amendment) Act, 2010, simultaneous protection of trademark in India and other countries has been made available to owners of Indian and foreign trademarks. It also seeks to simplify the law relating to the transfer of ownership of trademarks by assignment or transmission and to bring the law in line with international practices.

Copyright Act, 1957 ("Copyright Act")

The Copyright Act, 1957, along with the Copyright Rules, 1958, (collectively, "Copyright Laws") governs copyrights subsisting in original literary, dramatic, musical or artistic works, cinematograph films, and sound recordings, including computer programmes, tables and compilations including computer databases. Computer programme constitutes a literary work under Indian law and is afforded copyright protection and the owner of such computer programme becomes entitled to protect his works against unauthorized use and misappropriation of the copyrighted work or a substantial part thereof. Any act of this nature entitles the copyright owner to obtain relief from a court of law including injunction, damages and accounts of profits. Further, copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work and

once registered, copyright protection remains valid until expiry of sixty years from the demise of the author. Reproduction of a copyrighted computer programme for sale or hire or trade exhibit in public or distribution or commercial rental, offer for sale or commercial rental, issuing copy(ies) of the computer programme or making an adaptation of the work without consent of the copyright owner amounts to infringement of the copyright. However, the Copyright Act prescribes certain fair use exceptions which permit certain acts, which would otherwise be considered copyright infringement.

The Patents Act, 1970 (“Patents Act”)

The Patents Act, 1970 (“Patents Act”) governs the patent regime in India. Being a signatory to the Agreement on Trade Related Aspects of Intellectual Property Rights, India is required to recognize product patents as well as process patents. In addition to the broad requirement that an invention satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection, the Patents Act further provides that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. Section 39 of the Patents Act also prohibits any person resident in India from applying for a patent for an invention outside India without making an application for a patent for the same invention in India. The term of a patent granted under the Patents Act pursuant to Section 53 is for a period of twenty years from the date of filing of the application for the patent. A patent shall cease to have effect if the renewal fee is not paid within the period prescribed for the payment of such renewal fee. While the Patents Act prohibits patentability of a ‘computer programme’ as such, computer programmes in combination with novel hardware could be considered patentable depending on the substance of the invention and applicable provisions of the Patents Act. Computer programmes on their own are excluded from patent protection and are protected as a literary work under the Copyright Laws. In terms of the Patent Act, the patentee holds the exclusive right to prevent third parties from the using, offering for sale, selling or importing for such purposes, the patented product or product obtained directly by a process patented in India.

Designs Act, 2000

The Design Act, 2000 came into force in May 2001 to consolidate and amend the law relating to protection of designs. A design refers to the features of shape, configuration, pattern, ornamentation or composition of lines or colours applied to any article, in two or three dimensional or both forms. In order to register a design, it must be new and original and must not be disclosed to the public anywhere in India or any other country by publication in tangible form or in any other way prior to the filing date. A design should be significantly distinguishable from known designs or combination of known designs in order for it to be registerable.

FOREIGN EXCHANGE LAWS:

The FTDR, read along with the Foreign Trade (Regulation) Rules, 1993, provides for the development and regulation of foreign trade by facilitating imports into, and augmenting exports from, India and for matters connected therewith or incidental thereto. It authorizes the government to formulate as well as announce the export and import policy and to keep amending the same on a timely basis. The government has also been given wide power to prohibit, restrict and regulate the exports and imports in general as well as specified cases of foreign trade. The FTDR read with the Foreign Trade Policy, 2023, prohibits anybody from undertaking any import or export except under an importer-exporter code (“IEC”) number granted by the Director General of Foreign Trade. Hence, every entity in India engaged in any activity involving import/export is required to obtain an IEC unless specifically exempted from doing so. The IEC shall be valid until it is cancelled by the issuing authority. An IEC number allotted to an applicant is valid for all its branches, divisions, units and factories. In terms of the Consolidated FDI Policy, the work of granting government approval for foreign investment under the Consolidated FDI Policy and FEMA has now been entrusted to the concerned administrative ministries/departments.

The Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2017 as amended in 2019, provide that the total holding by any individual NRI, on a repatriation basis, shall not exceed 5 percent of the total paid-up equity capital on a fully diluted basis or shall not exceed five percent of the paid-up value of each series of debentures or preference shares or share warrants issued by an Indian company and the total holdings of all NRIs and OCIs put together shall not exceed 10% of the total paid-up equity capital on a fully diluted basis or shall not exceed 10% of the paid-up value of each series of debentures or preference shares or share warrants; provided that the aggregate ceiling of 10 percent may be raised to 24 percent if a special resolution to that effect is passed by the general body of the Indian company.

The increase in total income of the company is due to a significant increase in the revenue of the company due to increase in number of warehouses and transportation vehicles of the company has also increased.

Net revenue from operations for the year ended March 31, 2024, stood at Rs. 5870.63 Lakhs whereas in Financial Year 2022-23 it stood at Rs. 4355.45 Lakhs representing an increase of 34.72%.

Increase in revenue service wise can be seen as below:

<i>(Amount in lacs)</i>		
Particulars	March 31, 2024	March 31, 2023
Sale of services		
-C & F Charges Income (Rake Handling)	1,199.84	969.39
-C & F Charges Income (Warehouse Handling)	1,215.45	977.15
-Secondary Transportation Income	2,970.10	1,976.08
-Business Auxiliary Services Income	297.55	260.01
Other operating revenues		
-Rental Income	187.70	172.82
TOTAL	5,870.63	4,355.45

From the above-mentioned table, it can be inferred that the overall revenue of the company has increased in all the categories of revenue. This increase can be attributed to the rise in the number of rakes, which went from 125 in FY 2023 to 174 in FY 2024. As a result, transportation income and C&F income from both rake handling and warehouse handling charges increased significantly.

Also, the increase in revenue is also due to increase in transportation income, i.e., from Rs 1976.08 lakhs in FY 2023 to Rs 2970.10 lakhs in FY 2024. The increase in transportation income is calculated by total cargo handled by the company in MT throughout year. Please find below details of the same below:

<i>(Amount in MT)</i>		
Particulars	March 31, 2024	March 31, 2023
Cargo Handled	4,06,675.14	3,97,494.13
Growth %		2.31%

Further, this would also impact warehouse handling income of the company, as it can be seen above that the company manages 1,42,503 MT in FY 2023 which increased to 1,71,903 MT in FY 2024. Overall, this results in the increase of revenue generating from warehouse handling from Rs 977.15 lakhs in FY 2023 to Rs 1215.45 lakhs in FY 2024.

Other Income:

Other Income for the year ended March 31, 2023, stood at Rs. 16.56 Lakhs whereas in the Financial Year 2023-24 it stood at Rs. 6.22 Lakhs representing a decrease of 62.40%.

This decrease in other income is due to decrease in other incomes of the company like interest on income tax paid, balance written off, and other miscellaneous incomes to nil in FY 2024.

Total Expenses:

The total expenses for the year ended March 31, 2024, amounted to Rs. 5,341.27 lakhs, compared to Rs. 4,281.07 lakhs in the financial year 2022-23, reflecting a 24.76% increase. However, when measured against the revenue for each year, total expenses decreased from 97.92% of total income in FY 2023 to 90.89% of total income in FY 2024. This change in total expenses is attributed to variations in costs such as employee benefits, finance costs, depreciation, and other expenses.

Employee benefits expense:

The Employee benefit expense for the year ended March 31, 2024, stood at Rs. 695.83 Lakhs, whereas in Financial Year 2022-23, it was Rs. 579.59 Lakhs, representing an increase of 20.06%.

Please find below bifurcation of increase in cost from FY 2023 to FY 2024:

Particulars	FY 2024	FY 2023
Salaries and wages		
-Bonus Expenses	23.63	20.01
-Salary Expenses	529.61	449.64
Contribution to provident and other funds

-Gratuity Expenses	10.06	7.65
Staff welfare expenses	100.60	79.81
TOTAL	695.83	579.59

This significant increase in Employee Benefit Expenses in Financial Year 2024 compared to Financial Year 2023 is primarily attributable to the increase in the number of employees from 137 in FY 2023 to 144 in FY 2024. Consequently, all associated costs, including contributions to provident and other funds, have risen proportionally. Also, the company gave increment to its existing employees at an average growth rate of 10%, which further increased the salary expense in FY 2024. Furthermore, it can be inferred that bonus expenses increased from Rs 20.01 lakhs in FY 2023 to Rs 23.63 lakhs in FY 2024.

Finance costs:

Finance cost of the company has slightly increased from Rs 269.49 lakhs in FY 2023 to Rs 281.01 lakhs in FY 2024. The slight increase in interest expense is due to utilisation of cash credit facility that the company has taken from Kotak Bank Limited in FY 2024. Other than this expense, the other interest cost is related to interest charges on the term loans and vehicle loans of the company.

was only Rs 10.03 lakhs, leading to decrease in the amount of depreciation charged by the company in the particular year.

Other expense:

The Other Expenses for the year ended March 31, 2024, stood at Rs. 4,087.81 Lakhs whereas in Financial Year 2022-23 it stood at Rs. 3,153.53 Lakhs representing an increase of 29.63%. However, sales of the company have also increased by 34.79%. Hence, overall, it can be seen that the other expenses of the company have decreased in comparison to total income of the company. - **Wharfage Charges:** Wharfage charges of the company has declined drastically from Rs 25.91 lakhs, leading to 0.59% of the total income in FY 2023 to Rs 6.11 lakhs making 0.10% of the total revenue in FY 2024. SEBI through the UPI Circulars has proposed to introduce an alternate payment mechanism using Unified Payments Interface (“UPI”) and consequent reduction in timelines for listing in a phased manner. Subsequently, for applications by Retail

Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and RIIs submitting their ASBA Forms through Designated Intermediaries (other than SCSBs) can only use UPI Mechanism with existing timeline of T+6 days until further notice pursuant to SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020 (“UPI Phase II”).
